A Thank You To
THE BEST TEACHERS I'VE EVER HAD

As testimony, all SRIIT Hyderabad students who are going to USA for completing their B.Tech final year have given the feedback for incredible teachers who have made them capable of being eligible to go abroad:

"I liked Maths by Anjaiah sir, and subjects by Hari Krishna sir and Sravan sir"

---Ennamaneni Anudeep

"I liked Java by HOD Sir, Design & Analysis of Algorithms by Sravan Sir & Mathematics -3 by Anjaiah Sir"

---Kosana Ashish

"I liked COA, SSD, MPMC, JAVA, DLD, Psychology & teaching style of Laxmi mam and Suresh sir"

---P. Akshay Kumar

"I liked Data structures, C, C++, Java, Web Technology and Maths"

---Dondapati Praveen

"I liked Data structures Anil Reddy sir, teaching with real life examples"

---G Rohitha Sresta

"I liked Data Structures and Object Oriented Programming subjects taught by Anil sir"

---P. Varshith Kumar

"I liked Object Oriented Programming subjects taught by Anil sir"

---B. Dhanya

"I liked Data Structures by Anil Sir and All subjects taught by Principal sir"

---K Varsha

"I liked COA and DMS taught by Principal Sir, Data Structures and Object Oriented Programming taught by Anil sir"

---K Rithwik

"I liked Suresh Sir subjects"

---T. Pavan Balaji

"All the teachers were very helpful and supportive towards me. One way which I found more helpful for me was to give weekly tests for what topics were covered. I didn't like it back then but I realized it was the best way to score well in the exams because it made me confident for my mid exams as well as sem end exam"

---Sanjana Singh

"I think that every teacher has unique way of teaching and I like the teaching process of Mr. Anil , He taught us web technology and made the subject fascinating by showing us real-world applications and projects, making the learning process engaging and practical"

---S Sameera

"Best taught courses according to me were programming languages such as C, C++, Java, Data Structures. One teaching practice I really liked was the Sessions of Dr. Harikrishna sir(Head of the Department) . He often used online tools and real life examples to demonstrate complex concepts in programming languages. This approach made the lessons much more engaging and helped me understand the material better. It was a lot more effective than just reading from a textbook "

---C Niharika

"Every teacher had their own and unique way. To name a few , Hari Krishna sir's way of connecting programming problems with real life examples. Sravan Sir going to depth of topic to make students understand. Anjaiah Sir and Suresh Sir , no matter how many times the student asks , they are ready to explain the topic again and clear the doubts. Laxmi mam, whatever the subject she taught, always had a different way to make topic understandable and relatable. Ujjwala mam teaches the class in such a way that she makes the topic interesting "

---K Sahitha

"All the computer science related subjects were taught the best useful for both SRIIT and UMass. I liked both practical and theoretical way of mostly programming languages and elective subjects such as finance, philosophy, psychology "

---G Neha
